62-61 SPECIAL OFFER OF *1907*

Palisades Popular Perennials

THE KIND OUR GRANDMOTHERS GREW

WAS it ever brought to your notice how inexpensive it is to acquire a permanent flower garden that will last for generations?

After dreary winter is past how fondly we look forward to seeing old associates of spring and summer time, who call annually without the ceremony of digging or planting!

There are few things that call to mind more vividly pleasant recollections of our early life than the sight or odor of a simple flower, loved perhaps by some relative or friend; and what would be a more suitable remembrance than to plant such a one so that it may be called his or hers for time to come?

We give on the seventh page of this circular a list of one hundred kinds with botanical and familiar names, with some of which you may have a fellow-feeling, and if planted even in the least conspicuous corner or border they will make it the most interesting part of the garden.

GROWERS OF HARDY PLANTS

WI利HELM MILLER says in the Garden Magazine: "But now that the treasures of the Far East are lavished upon us, we have hardy plants suitable for practically every purpose the most exacting gardener can conceive. And wherever we have any special object to accomplish, we ought to try nine times to find a hardy plant that will do the work before falling back on a tender one. And this for two reasons: First, hardy plants harmonize better with our climate and environment than tropical plants. Second, as a rule, they are cheaper to maintain. And, in the long run, those effects which grow naturally out of the soil, and out of true economy, will be recognized as the most artistic."

TO ENCOURAGE THEIR USE WE ARE MAKING THIS SPECIAL OFFER

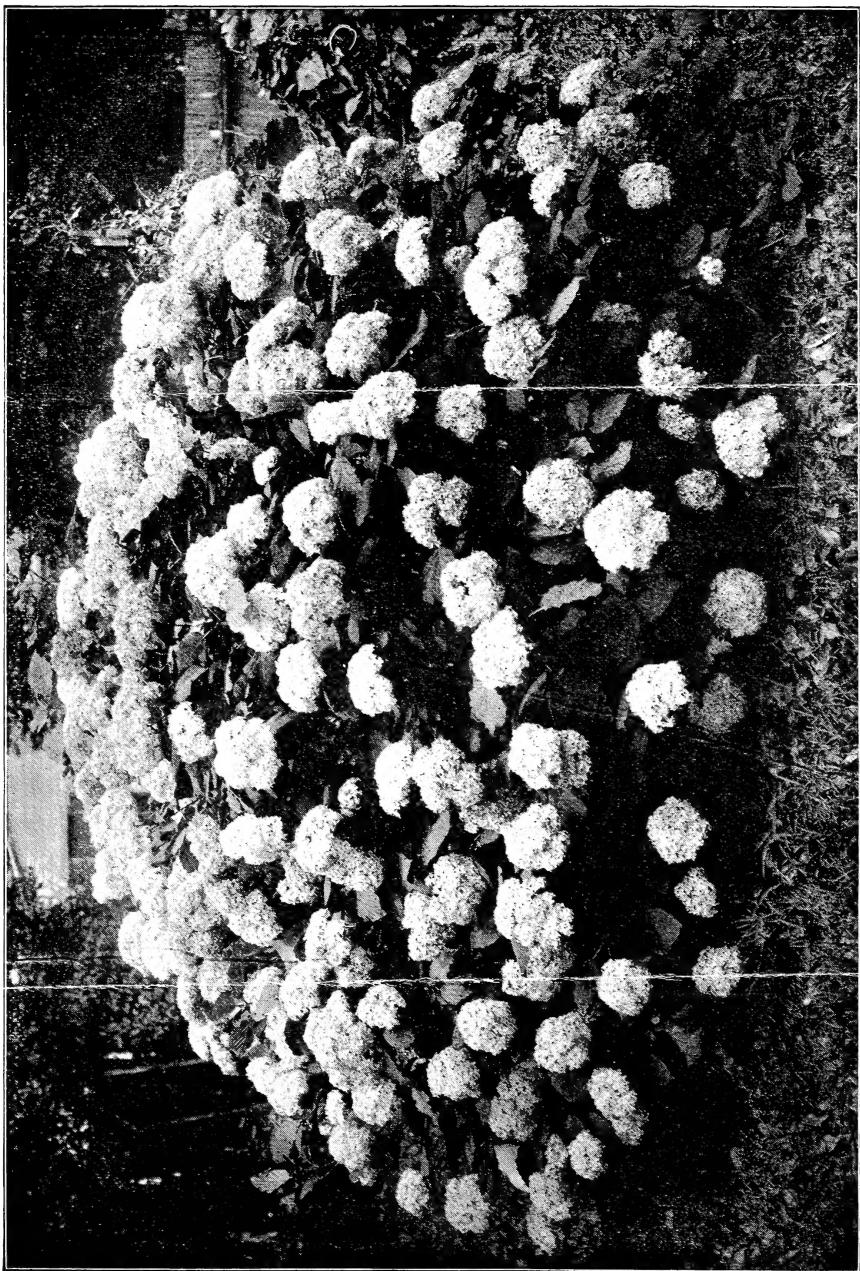

You may select from one to one thousand in any assortment (or we will make a selection for you) at the prices named below, and we deliver without further expense to your express or post-office (our option) strong plants of varieties named on seventh page of this circular. When a preference for certain varieties of the kinds named is given we will try to comply, otherwise our selection will be sent.

PRICES at which we will deliver, express and postage paid, strong plants of the varieties named on page 7 of this circular.

HYDRANGEA ARBORESCENS GRANDIFLORA.
"HILLS OF SNOW."

Hydrangea Arborescens Grandiflora.

“HILLS OF SNOW.”

This superb new Hydrangea is a variety of the hardy native species *H. arborescens*, commonly found “wild” in most of the states east of the Mississippi river. The variety *grandiflora* is likewise absolutely hardy and is, moreover, of easy culture and is an exceedingly prolific bloomer. A five year old plant has produced one hundred and twenty-six perfect blooms at one time.

The size of the flower is one of the striking features of this shrub. The large flower shown on the first page of this circular measured nine by twelve inches. Twelve inch blooms are frequent on young plants, while the *average* size on matured plants is usually six inches or more.

The color of the flower is a pure snowlike white, without the creamy and later pink tints that are characteristic of the *H. paniculata grandiflora*. The length of time this whiteness is retained depends somewhat on local conditions, but usually from four to five weeks, when the flowers begin to change slowly and gradually to a light green color, and by October the foliage and flowers are of a similar shade. The flower clusters remain intact long after the leaves have fallen, and frequently throughout the following winter.

This Hydrangea gives every promise of becoming even more popular than the well known *H. paniculata grandiflora*, as it lacks the coarseness and stiffness of that variety; it is refined in tone and effect, and with its abundant and handsome foliage it lends itself readily to landscape effects. It is a comely, handsome shrub at all times. It reaches a height of five to six feet, and when in full bloom is one of the most striking as well as the most beautiful shrubs of its season, suggesting the descriptive synonym referred to in Bailey's “Cyclopedia of American Horticulture,” viz.: “Hills of Snow.”

Price of 2 yr. old field grown plants, 2 to 3 ft., 3 to 5 stems, 35 cts. each, \$3.50 per doz.; 1 to 3 stems, 25 cts. each, \$2.50 per doz.

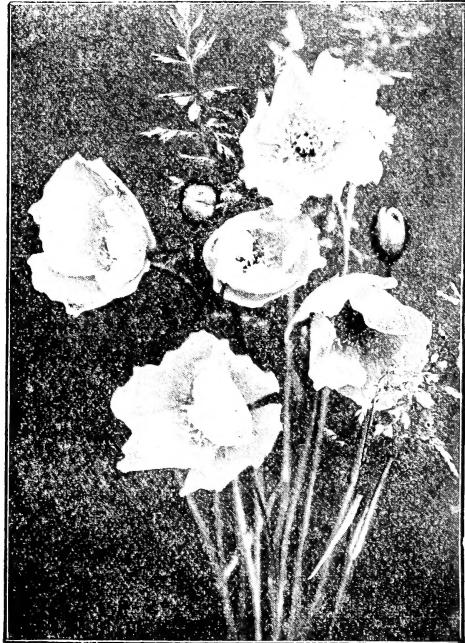

Price of Plants from 3-inch pots, 15 cts. each, \$1.00 per doz., \$6.00 per 100. All will flower the first year.

PALISADES NURSERIES, Inc.

SPARKILL, N. Y.

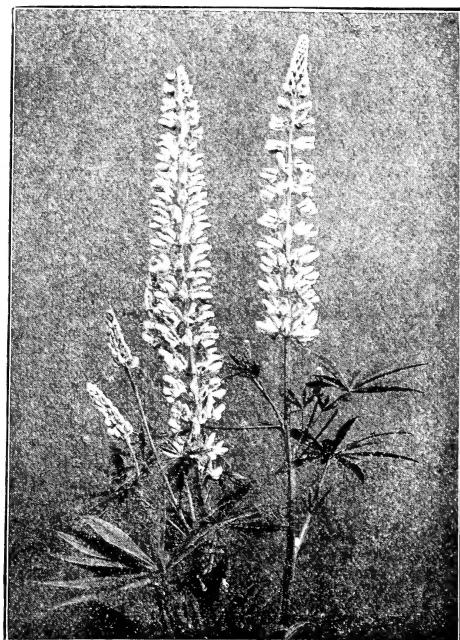

CHRYSANTHEMUM MAXIMUM (The Shasta Daisy, California). This fine species ranks among our best, showiest, and most valuable hardy summer-flowering border plants: for cutting they are invaluable, their large snowy white Daisy-like flowers lasting long in water, while in the border they make elegant bushes, smothered in blossom: all quite hardy, and suitable for any ordinary garden soil. *July and August flowering.*

PAPAVER NUDICAULE. (Alpine Poppies.)

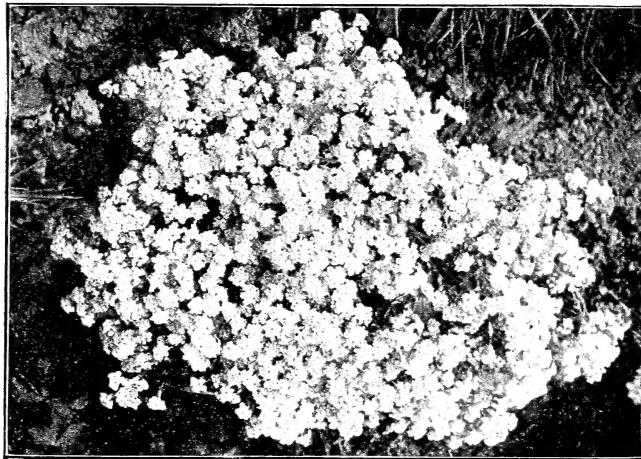

Elegant dwarf Poppies with abundance of graceful showy flowers from May to September. Prized for cutting. As border plants it would be impossible to over-estimate their value. Height 1 ft.

LUPINUS POLYPHYLLUS

(The old-fashioned Garden Lupin)

Bearing stately spikes of blue, white and pink flowers in June. Height 3 ft.

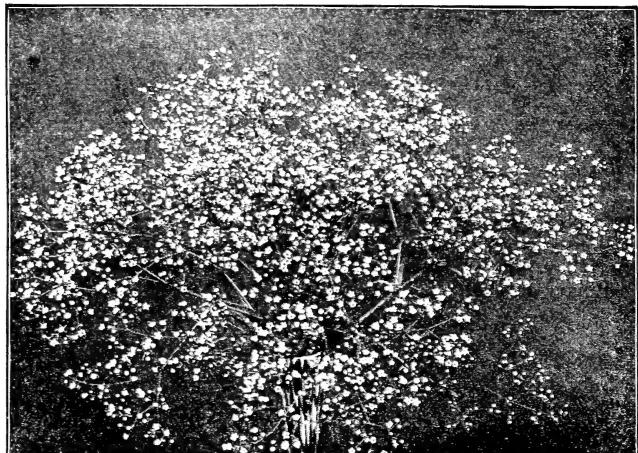

ALYSSUM (Sweet Alyssum
or Mad Wort)

Effective in beds, edgings borders or on rockwork: the sheets of yellow flowers contrast charmingly in spring with Arabis. They thrive in any soil in a sunny position

GYPSOPHILA PANICULATA
(Chalk Plant or Babies'
Breath)

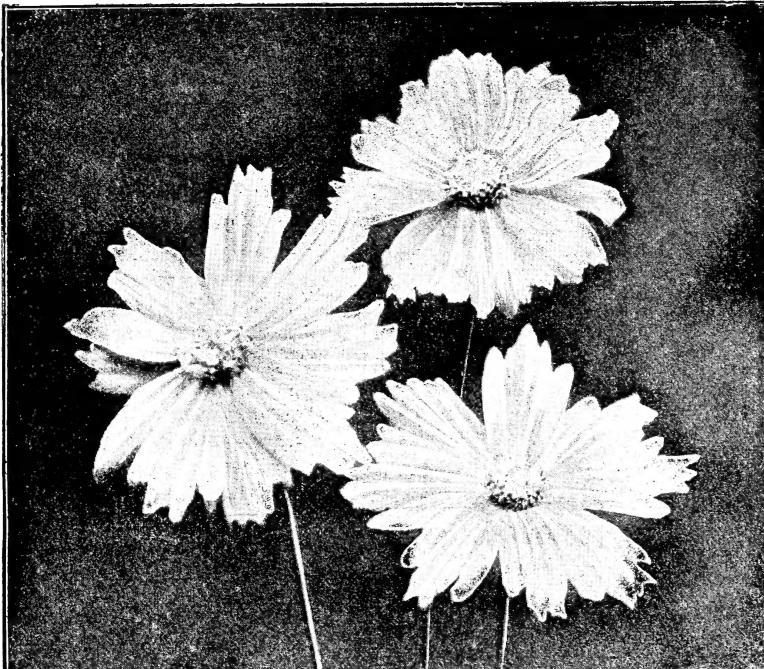

A graceful border plant, growing into a compact bush 2 to 3 ft. high, smothered in summer with small white flowers; very elegant in table bouquets, etc.

HELENIUM AUTUMNALE
(Autumn Sneezewort)

Handsome border plants closely allied to the Perennial Sunflowers (*Helianthus*); they are all of easiest culture and well deserving of a place in the hardy flower border.

They are tall and stately and give a remarkable quantity of bloom.

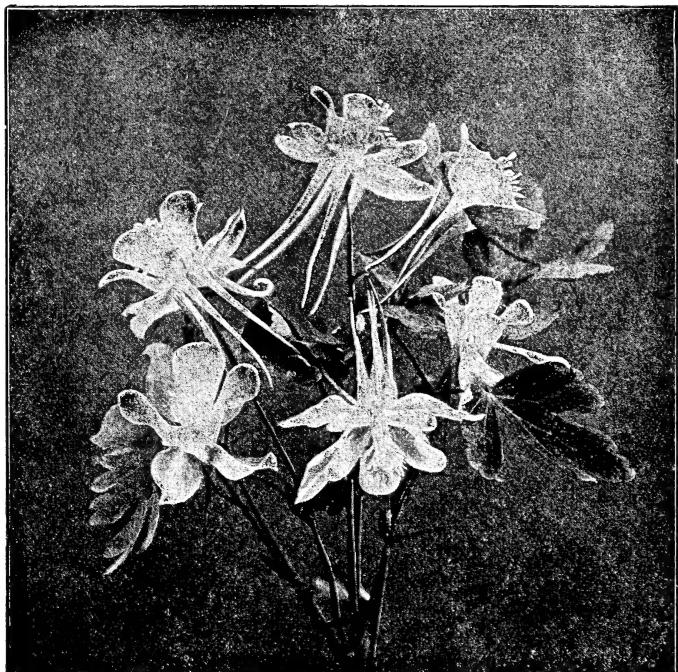

COREOPSIS
(Lanceolata
Grandiflora)

Valuable border plants, supplying throughout summer abundance of showy elegant yellow flowers, much prized for cutting. They are of the easiest culture, thriving even in town gardens, where their bright-colored flowers are greatly appreciated.

AQUILEGIA
(Columbine)

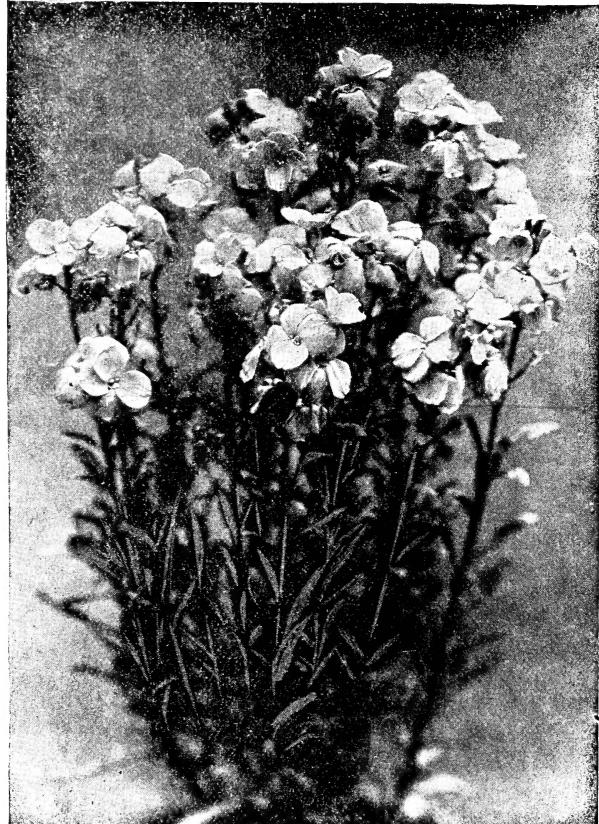

Few plants lend themselves to naturalization more readily, or look more beautiful in grassy glades and woodland walks, than the Columbines; they grow and thrive in shady nooks and corners where most plants have to struggle for existence. In borders their graceful beauty is highly appreciated, while the flowers are invaluable for cutting.

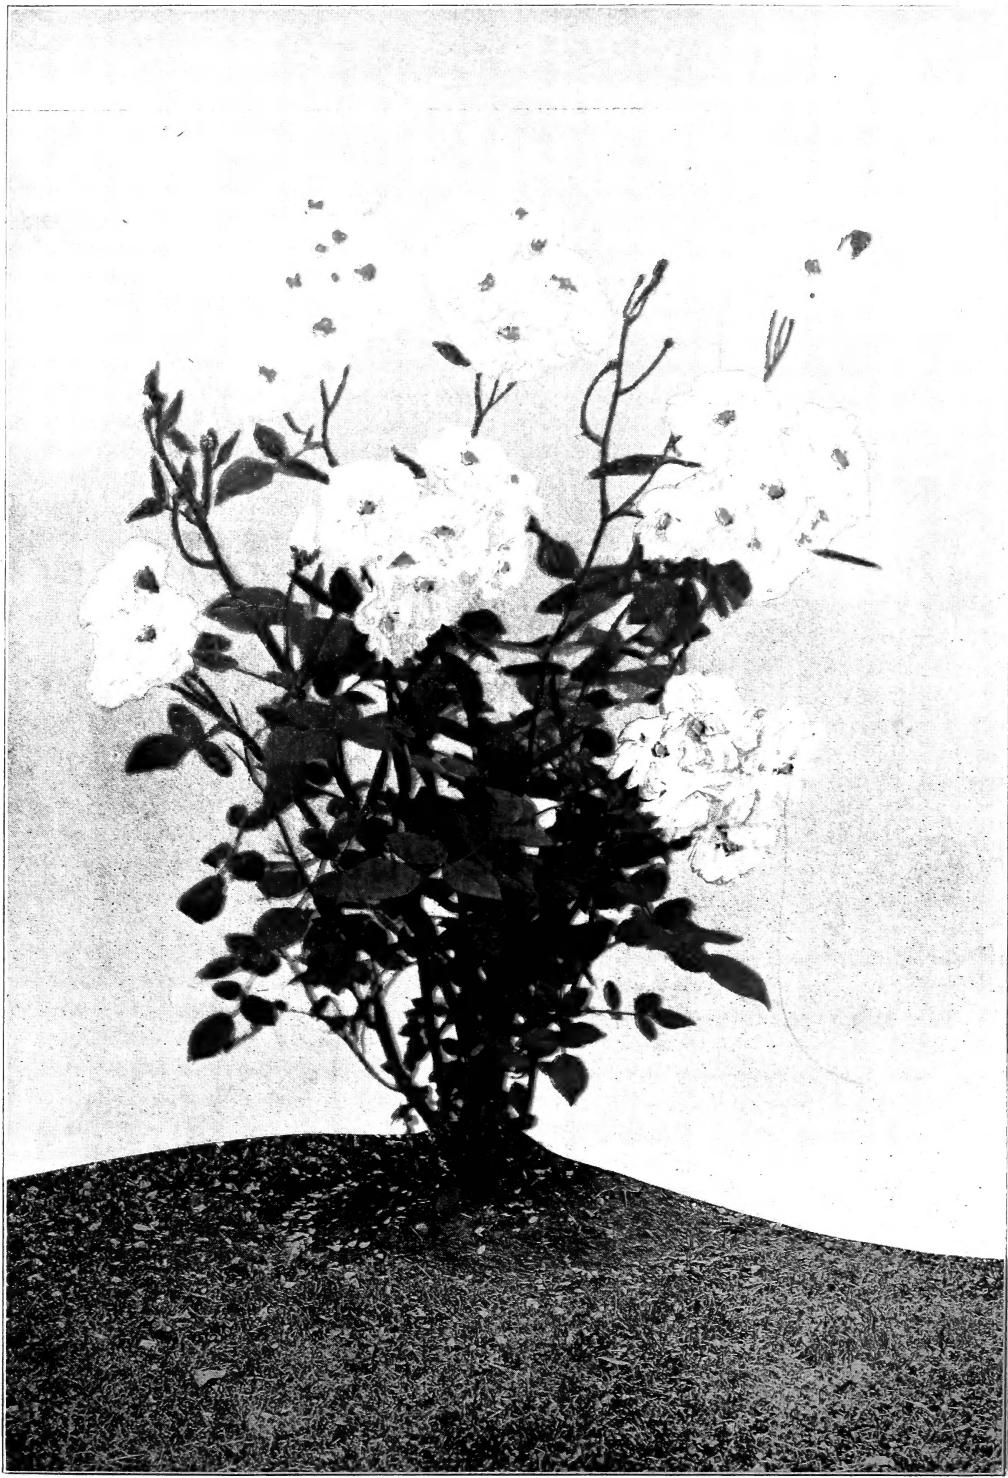

PRIMULA
(Hardy English Primrose)

A Primula garden is a charming sight, and once seen is not soon forgotten. Naturalized in shady spots on rockeries and on walls, etc. These Alpine gems present a lovely picture in spring and early summer. All hardy. Most varieties stand gentle forcing and are much in demand at Easter.

WALLFLOWER (English)

No plant is more esteemed in an English garden than the Wallflower, on account of their very fragrant flowers, the colors of which run from pale yellow to deepest blood-red, and are very useful for cutting.

VREDENBURG & CO INC ROCHESTER N Y

WHITE BABY RAMBLER

A charming companion to the well-known Crimson Baby Rambler. Of the same habit of growth; hardy; pure white, very double, and deliciously fragrant; makes a fine border or small hedge; blooms continuously. When planted in combination with Crimson Baby Rambler, the effect is very striking.

A Triplets Collection, consisting of

BABY RAMBLER (Crimson)

WHITE BABY RAMBLER

and **BABY DOROTHY**

(PINK—Same color as Dorothy Perkins).

We offer a fine block of strong, two-year-old field plants.

Price of strong, field-grown, 2-year-old plants, 25 cts. ea.,
\$2.50 per doz., \$20 per 100; plants from $2\frac{1}{2}$ -in. pots,
10 cts. each, 85 cts. per doz., \$6.50 per 100.

Some of the NOVELTIES and SPECIALTIES from our 1910 Catalogue

SIBERIAN EDELWEISS. (*Leontopodium Sibiricum.*) The Edelweiss is well known to tourists who have travelled in Switzerland. This variety is distinguished by its simple culture and its very large white blossoms, which are twice the size of the Alpine variety. 25 cts. each, \$2.50 per doz.

HELIANTHI. (*The wonderful new winter vegetable.*) The greatest addition to the vegetable kingdom for many years. A complete substitution in taste for fresh asparagus. Yields half as much again as the potato.

Food Value—Dr. Koch, a well known food specialist, gives the following figures as units of food value: Helianthi 540.5, Green Peas 465.0, Turnips 133.0, Potatoes 126.8. This interesting comparison needs no comment. Price, strong plants, 15 cts. each, \$1.50 per doz.

ANCHUSA. Italica, Dropmore Variety.

Sterling novelty. The splendid flowers are of the purest blue imaginable and produced on branched stems, growing about 4 feet high. Strong plants, 15 cts. each, \$1.25 per doz., \$9.00 per 100.

ASTER (Michaelmas Daisy). Beauty of Colwall. The flowers are perfectly double, of a very pleasing shade of lavender; produced in great freedom on stout, erect stems, about 4 feet high. Awarded Certificate by the Royal Horticultural Society.

Strong plants 25 cts. each, \$2.50 per doz.

Seed of Mixed Hardy Perennials

We furnish Seed in mixtures of over 100 Varieties of Perennial Flower Seeds of our own saving. Suitable for Naturalizing at 10 cts. per packet, \$1.00 per ounce.

Chrysanthemum Bridal Robe

CHRYSANTHEMUM INODORUM (Bridal Robe)

Although this is said to be a Biennial, we find that for several years it comes up with us annually and withstands the most severe winters without injury. It is a magnificent border plant. Flowers continually the whole summer and fall, bearing large sprays of double white flowers in great profusion, very suitable for cutting, especially on account of its fern like foliage. See photo engraving. Strong plants 15 cents each, \$1.50 a dozen.

CHRYSANTHEMUM

Nipponicum. A hardy Japanese species. A variety worthy of special notice and not well known. Large Marguerite-like flowers, distinct, shrubby, with dark, spiny foliage; flowers during summer and autumn, but in milder climates during the whole year. 10 cts. each, \$1.00 per doz., \$7.50 per 100.

Wonderberry, Sunberry or Garden Huckleberry. Much has been said for and against this plant.

Plants from 3 inch pots, that will bear the first year. 15 cts. each.

\$1.00 per dozen.

\$7.50 per 100.

Seed, 10 cts. per packet.

DIANTHUS. Comtesse Knuth. New Hardy Yellow Carnation. Originated in Denmark and the introducers claim it to be perfectly hardy even in the most severe winters. The flowers are bright yellow, produced on stiff stems, 24 to 48 inches long. Plants from small pots, 50 cts. each.

PHLOX. Divaricata Laphamii. (Perry's variety.) Most beautiful and distinct variety of the Divaricata or Canadensis class recently introduced. The flowers are much larger and brighter in color than those of *Phlox divaricata*. It is of a strong growing habit and flowers most abundantly from the middle of April till the end of July. Strong plants 15 cts. each, \$1.50 per doz., \$10 per 100.
